

Nixxis Contact Suite 2.1.11

Generated on 25/09/15 14:47:52

Bug corrections

1459	ProgressReport procedure uses ambiguous column name
1469	Cryptographic exception when verifying licenses
1478	Incorrect dialplan in outbound.conf
1506	Manual calls recording control cannot be made using default settings
1508	Automatic recording default settings are not correctly stored in admin database
1510	No recording on outbound calls when using http information exchange
1514	Dutch black list is not accessed correctly when using belmeniet extension
1522	Enqueued callbacks don't work as expected when the inbound activity does not explicitly specify the callback activity
1525	Exception when processing MonsitorStart stat event
1527	Useless exception on server (CrNixxisClient module) when team memberships are modified
1529	Under some precise timing conditions, the dialer can change the state of an agent from "not ready voice" to "ready voice"
1532	Using enqueued callbacks can lock the dialer under particular timings and heavy load
1537	Heavy SQL load could happen when an outbound activity has no record anymore
1547	ApplicationServer does not always guess a device location correctly
