Bug corrections

2190	Admin: disabling an inbound activity in a simple campaign can cause incorrect behavior if a callback activity is used
2192	Admin: new groups are not visible until a save is applied
2194	Admin does not react correctly when a resource base uri is not set
2196	In admin, SSH settings cannot be edited when no base URI is defined on a resource
2199	Issue in administration when using "Area work without members" option
2213	When a call comes from an IVR, the language is not taken into consideration when playing the message for closed period.
2214	Admin: setting language to "<none>" on related prompt in queue pops up dialog when closing client.
