

Nixxis Contact Suite 2.2.3

Generated on 07/06/2016 12:32:08

Bug corrections

| | |
|------|--|
| 1247 | In the reports/exports, the forwarded emails are classified as "System Processing" |
| 1769 | When the agent receives email, he is not always able to see files attached |
| 1781 | Supervision piechart dashboard widget does not appear nicely when no data available |
| 1848 | Line restrictions on outbound activities does not take into account the zero line limit |
| 1865 | Script URL does not encode parameters, generating a potentially invalid URL |
| 1870 | Missing primary key on ObjectsSecurity can lead to duplicates in table, causing the admin to fail during startup |
| 1872 | Deletion of appointment context can lead to inconsistent admin database |
| 1874 | Invalid reference in admin XML data causes the client software to crash |
| 1878 | Exception when launching "Agent state details" report |
| 1880 | Exception when server translates progress messages in a regionalized language |
| 1882 | Leg connected to queue server is not immediately dropped when agent's extension and queue extension are connected at the same time |
| 1887 | Reporting default timeout (about web services access) is often too short |
| 1889 | Incorrect initialisation of quotas settings |
| 1892 | Chat application does not work properly with Nixxis V2.2 |
| 1898 | Report "BC progress report" is not working |
| 1938 | Custom export does not handle "select all" and "select none" |
| 1949 | When a Pause is renamed the table admin.Translations is not updated |
| 1950 | Uploading new prompts can sometimes prevent the admin to commit the changes |
| 1974 | AppServer behavior becomes unstable under high memory usage |
| 1976 | DialerStats uses too much memory and threads |
| 1980 | When importing data in the administration tool, the checkbox "remove prefix" has no effect |
| 1982 | Supervision counters related to outbound queues are not always correct |
| 1984 | The qualification creation wizard does not allow positive and argued attributes to be sepcified |
| 1989 | Administration takes time to parse XML data |
