

## Nixxis Contact Suite 2.2.4

Generated on 25/08/2016 18:47:49

**Bug corrections**

2013	Incorrect rights verification when evaluating supervisor power flag
2015	Exception in trace file after changes in Http.config
2021	In admin, agents range creation does not handle the team membership specified in wizard
2025	Https scheme not correctly supported by admin client software when uploading files
2027	Major issue in quotas handling when updates affect more than one record (recycle for example)
2029	In Identity SIP headers, display names are always enclosed in quotes, even when they are already present
2033	In quotas handling, time dependencies are not initialized correctly
2045	In the supervision's queue panel, when an agent is linked at two teams related to the same queue, the column "agentsReady" is increased by two
2048	Postprocessor "CRIVRmenu" are ignored if agent terminates contact quickly (automatic close script)
2049	IVR supervision counters are not decreased when using a postprocessor
2052	"outboundOriginatorPattern" (in sip.config) is not interpreted when the system uses the default originator
2058	Using a postprocessor causes the contact state to be "Abandon in IVR"
2065	Useless exception in SipServer
