

Nixxis Contact Suite 2.3.3

Generated on 27/04/2017 15:17:36

Bug corrections

- 2340 Admin: setting agent account to a sequence of spaces characters causes an empty account to be committed.
- 2345 Admin: NumericUpDown lists for line restrictions are only accepting values from range [0-127].
- 2349 Recording tool is not guaranteed to use the last user rights.
- 2352 When doing manual calls or forward, numbering rules are also applied on special destinations (queues shortcodes, agents account, etc.) when they should not.

Features

- 2355 eScript integration.
Administration allows choosing a script defined in eScript.
- 2358 Script URL can dynamically include value specified in Activities.ScriptParams.
The placeholder in the script URL is {13}.
